Website Technology Committee

In attendance: Aaron Vrooman, Ed Orr, Chairman Norman Gentry and Matthew French

- We looked at some websites that members of the committee had viewed and found to be good examples of well-designed websites.
- We looked at sites that were easy to read and navigate, were pleasing to the eye and could be quickly viewed with little or no scrolling.
- We discussed how some of these features might be good to have on the Epsom website.
- We talked about how we could utilize some free software for the site, such as calendar software, and how we may be able to use a free website template. This would allow for easy upkeep and alterations to the site.
- Additionally, we talked about how some sites use advertising, and how this could possibly be an option for the Epsom Town site as well. This could help to generate some revenue and provide residents with some information about local businesses. (If some local businesses were willing to do advertising on the site).
- The next meeting is scheduled for Tuesday, April 14th at 6:30PM.
